Annual Management Report of Fund Performance

This annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You may obtain a copy of the annual financial statements at your request, at no cost, by calling toll-free 1-866-377-4743, by writing to us at 1830 – 1066 West Hastings Street, Vancouver, BC V6E 3X2 or by visiting our website at www.penderfund.com or the SEDAR+ website at www.sedarplus.ca.

You may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

For the year ended December 31, 2024

#### MANAGEMENT DISCUSSION OF FUND PERFORMANCE

#### **Investment Objective and Strategies**

The objective of the Pender Small Cap Opportunities Fund (the "Fund") is to invest in a concentrated portfolio of well-managed businesses, with strong competitive positions, which are overlooked by the market and have the potential for significant capital appreciation. These businesses may be in Canada, the United States or in other foreign jurisdictions with a primary emphasis on companies with a small market capitalization. The Fund may also invest in any securities regardless of market capitalization, sector or region, including foreign equities where opportunities warrant. In some situations, the Fund may invest directly in companies, through private placements or public offerings, or may acquire previously issued shares, either through the facilities of a stock exchange, quotation system, or by private arrangement.

PenderFund Capital Management Ltd. ("Pender") is the Manager and Portfolio Advisor of the Fund.

#### Risks

The risks of investing in the Fund are outlined in the Simplified Prospectus dated June 28, 2024. There were no significant changes to the Fund's objectives and strategies that affected its overall level of risk during the year.

The nature of the Fund's investing activities exposes it to various risks, including but not limited to inflation and the impact of central bank measures on the economy, the state of M&A markets, geopolitical and other global events, factors that are beyond the Fund's control.

Future developments in these challenging areas could impact the Fund's results and financial condition and the full extent of that impact remains unknown. Developing reliable estimates and applying judgment continue to be substantially complex. Actual results may differ from those estimates and assumptions.

#### **Results of Operations**

The net assets of the Fund were \$420,885,231 as at December 31, 2024 versus \$246,273,105 as at December 31, 2023. Of this \$174,612,126 increase, \$151,384,474 is attributable to positive investment performance and \$23,227,652 is attributable to net unitholder purchases of Fund units (including \$16,055,882 of units issued from the merger described under "Fund Merger").

For the year ended December 31, 2024, Class A units of the Fund generated a total return of 57.2%. Returns for other classes of the Fund will be similar to Class A with any difference in performance being primarily due to the different management fees and performance fees that are applicable to different classes. Please see the "Past Performance" section for the performance of the Fund's other classes.

The Fund's broad-based benchmark, the S&P/TSX Composite Index ("S&P/TSX"), returned 21.7% during the year. In accordance with National Instrument 81-106, we have included a comparison to this broad-based index to help you understand the Fund's performance relative to the general performance of the market, but we caution that the Fund's mandate may be significantly different from the index. Further, the Fund's returns are reported net of all management fees and expenses for all classes, unlike the returns of the Fund's benchmark, which are based on the performance of an index that does not pay fees or incur expenses.

As at the end of the year, the Fund was 89.2% invested in Canada and 8.3% in the United States, other assets less liabilities of 2.3% and had cash of 0.2%. The Fund's investment portfolio is concentrated and not diversified in the conventional sense. The Fund's top 10 holdings account for 44.8% of the Fund's net assets at the end of the year. This concentration may lead to varied results over any given year.

The overall sector exposure of the Fund is determined by stock selection decisions and may shift from time to time. As at December 31, 2024 we were weighted toward holdings in the Information Technology, Health Care, and Industrials sectors because, currently, those are the sectors where we believe we are finding the best investment opportunities and, equally important, because they contain businesses for which we are best equipped to assess value. These top three sectors accounted for 69.1% of the Fund at the end of the year.

The following comments and the comments under "Recent Developments" reflect the views of the portfolio management team and are based on information as at the end of the year. Please read the caution regarding forward-looking statements located on the last page of this document.

The Fund's outperformance as compared to its benchmark was mainly due to an overweight in both the Health Care and Information Technology sectors. We do not actively manage sector weightings in the Fund, rather, our sector weightings are determined by individual stock selection through a bottom-up fundamental investment process. We seek to own stocks where our estimated range for the long-term intrinsic value of the business is higher than the current share price.

For the year ended December 31, 2024

Key positive individual contributors to the Fund's performance during the year included Copperleaf Technologies Inc., TerraVest Industries Inc., and Kraken Robotics Inc. Conversely, ATD New Holdings Inc., The Cannabist Co. Holdings Inc., and Chesswood Group Ltd. were among the largest detractors.

Portfolio transactions during the year were made based on our stock selection process. In general, we increased weightings of individual stocks where we determined the price relative to our estimate of intrinsic value had increased and decreased the weightings of companies that offered a less attractive return profile. We are constantly looking for new investment ideas and examples of new investments during the year included Logan Energy Corp. We may liquidate our positions for various reasons, such as when share prices have reached our assessment of fair value, when an acquisition has occurred, or where we have changed our investment thesis. For example, during the year, we sold our positions in Aritzia Inc., and Tiny Ltd. as well as a few other holdings. The market volatility has allowed us to be selective, adding companies to the portfolio that we believe to be high quality and present opportunities to compound for many years.

#### **Recent Developments**

Equity markets performed well in 2024, driven by easing inflation, accommodative monetary policy, and resilient financial conditions. Improving liquidity and declining bond yields also supported risk appetite in equities. Market sentiment remained positive across most asset classes, with high-yield spreads finishing the year near decade lows at 292 basis points, reflecting investor confidence. The strength in financial markets was supported by financial conditions that remained near all-time highs, a pattern that has historically coincided with equity market strength.

As 2025 begins, equities enter the year with optimism but also potential risks. Elevated valuations in large caps, market concentration and elevated expectations in some key index names could make the overall equity market vulnerable to negative surprises and volatility as we enter the year. Potential headwinds could also include trade policies, particularly tariffs, which could weigh on corporate earnings, and fiscal challenges in developed economies as government deficit spending remains high.

Despite these near-term uncertainties, we remain constructive on the businesses we own in our portfolio or the mid to long-term. We remained vigilant in our analysis to identify trends that align with how the world is evolving and to allocate capital to companies that have attractive growth opportunities and tailwinds to their business fundamentals that are still mispriced by the market. This analysis applied consistently to small-cap companies offers a compelling opportunity set as we believe these companies are under-followed and under-appreciated.

We continued to manage a concentrated portfolio of investments, only needing to hold a relatively small number of great companies purchased at reasonable prices to drive the performance of the Fund. We will continue to upgrade the quality of the portfolio into our best ideas, those that we think could benefit from the tailwinds caused by changes in behaviors, potential disruption and that trade at significant discounts to intrinsic values.

#### Independent Review Committee ("IRC") Appointments & Resignations

Effective March 4, 2024, John Webster stepped down from the Independent Review Committee and John DeLucchi joined the Independent Review Committee.

#### **Fund Merger**

On June 28, 2024, the Pender Small/Mid Cap Dividend Fund was merged into the Fund. The two funds were both managed by the Manager, had the similar investment objective of achieving capital growth over the long term and both invest in businesses in similar geographic areas. However, the Fund's investment objective does allow for investment in foreign jurisdictions. Net assets of \$16,055,882 were acquired by the Pender Small Cap Opportunities Fund from the Pender Small/Mid Cap Dividend Fund.

#### **Related Party Transactions**

The Fund pays management and administration fees to the Manager for management and portfolio advisory services (see "Management Fees"). The Fund also pays the Manager performance fees in certain circumstances (see "Performance Fees").

As at the end of the year, parties related to the Manager collectively held 2% of the Fund's units. In addition, the Pender Partners Fund and Pender Strategic Growth and Income Fund, funds also managed by the Manager, collectively held 1% of the Fund's outstanding units.

For the year ended December 31, 2024

#### **Management Fees**

The Fund pays management and administration fees calculated as a percentage of the net asset value of each respective class. The Management Expense Ratio ("MER") before applicable taxes such as GST or HST for each class does not exceed certain levels as set out in the Fund's offering documents. The fees are calculated at the close of business on each valuation day and are paid monthly. In exchange for the administration fee, the Manager pays the operating costs of the Fund.

Management fees are used by the Manager, in part, to pay sales commissions, trailer fees, marketing costs and other associated distribution costs relating to the sale of units of the Fund.

Such expenses represented approximately 18% of the management fees paid by the Fund to the Manager for the year.

#### **Performance Fees**

The Manager is also entitled to a performance fee plus applicable taxes such as GST or HST in respect of Class B, Class G, Class M and Class O units of the Fund. The performance fee in relation to Class B, Class G and Class M units is equal to 20% of the amount by which the total return of the class of units exceeds the total percentage increase or decrease of the Fund's benchmark, the S&P/TSX Composite Index, for the period since the performance fee was last paid, subject to a relative high-water mark. The high-water mark is the net asset value of the applicable class of units to which it applies as at the most recent determination date on which a performance fee was payable. For Class O units, the performance fee is or will be separately negotiated and charged directly to Class O Unitholders, as applicable. Performance fees will be calculated and accrued weekly, and such accrued fees will be payable by the Fund at the end of each year. The Manager has reserved the right to change the period for which any performance fee may be paid by a Fund. The Manager, at its discretion, may reduce or waive performance fees.

#### **Financial Highlights**

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the calendar years indicated.

<sup>(</sup>b) Net assets per unit and distributions per unit are based on the actual number of units for the relevant Fund class outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding during the year.

<sup>(</sup>c) Distributions were paid in cash and/or reinvested in additional units of the Fund.

- (a) This information is derived from the Fund's audited annual financial statements as at December 31 for the year stated, prepared under IFRS Accounting Standards. Class H commenced operations on June 28, 2024.
- (b) Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the year and is expressed as an annualized percentage of weekly average net asset value during the year. The MER may vary from one class of units to another because of differences in the applicable management fees and certain fees and expenses may have been absorbed by the Manager which would otherwise be paid by the Fund. Management expense ratio before performance fee is the MER before any performance fees, if applicable, for the stated year.
- (c) The Manager of the Fund has agreed to absorb sufficient expenses of the Fund, as necessary, so that the annual MER before applicable taxes such as GST or HST will not exceed certain limits as outlined in the Fund's Simplified Prospectus. The amount of expenses absorbed is at the discretion of the Manager as set out in the Fund's Simplified Prospectus, and the Manager may in its sole discretion cease to absorb expenses.
- (d) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of weekly average net asset value during the year.
- (e) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. In general, the higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

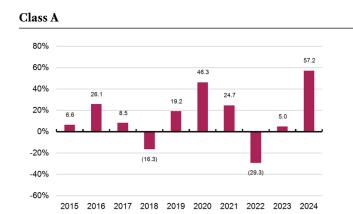

For the year ended December 31, 2024

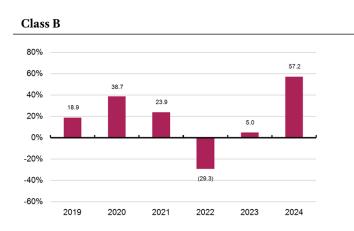

#### **Past Performance**

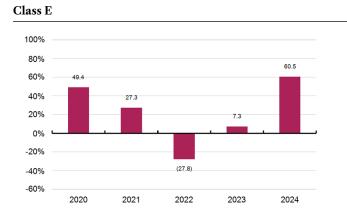

The following charts show the past performance for the units of each class of the Fund and do not necessarily indicate how the Fund will perform in the future. The information shown assumes that any distributions made by the Fund were reinvested in additional units of the Fund. Returns would be different if an investor did not reinvest distributions. In addition, the information does not take into account sales, redemptions, income taxes payable or other charges that would have reduced returns or performance. Past performance for Class H units of the Fund is not available for disclosure because, having commenced operations on June 28, 2024, the class has been in operation for less than one year.

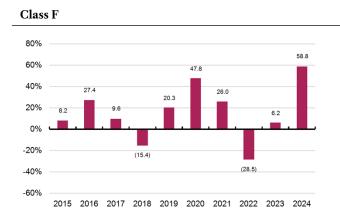

#### Year-by-Year Returns

To illustrate how the Fund's performance has varied over time, the following bar charts show the Fund's annual returns for the calendar years indicated. The information is presented starting from the first full financial year of the respective Fund class. In percentage terms, the bar charts show how much an investment held on the first day of the year would have increased or decreased by the last day of the year.

#### **Annual Compound Returns**

The annual compound returns table compares the Fund's performance to one or more benchmarks. Benchmarks are usually an index or a composite of more than one index. An index is generally made up of a group of securities. Since the Fund does not necessarily invest in the same securities as an index or in the same proportion, the Fund's performance is not expected to equal the performance of the index. Fund returns are reported net of all management fees and expenses for all classes (prior to June 30, 2021, the Fund's MER was inclusive of applicable taxes such as GST or HST), unlike the returns of the Fund's benchmark, which are based on the performance of an index that does not pay fees or incur expenses. It may be more helpful to compare the Fund's performance to that of other mutual funds with similar objectives and investment strategies.

The Fund's broad-based benchmark is S&P/TSX Composite Index. The S&P/TSX is the headline index for the Canadian equity market. With approximately 95% coverage of the Canadian equities market, it is the primary gauge for Canadian-based, Toronto Stock Exchange listed companies.

A discussion of the performance of the Fund as compared to its benchmarks is found in the "Results of Operations" section of this report.

	Inception Date	1 Year (%)	3 Year (%)	5 Year (%)	10 Year (%)	Since Inception (%)

#### **Summary of Investment Portfolio**

The largest holdings of the Fund as at the end of the year and the major asset classes in which the Fund was invested are indicated below. Where the Fund has less than 25 holdings, the table will show the Fund's entire investment portfolio. The investment portfolio may change due to ongoing portfolio transactions. An update of the Fund's summary of investment portfolio as at the end of each calendar quarter is available from the Manager. Please see the front page of this document for information about how this can be obtained.

#### **Caution Regarding Forward-Looking Statements**

This report contains forward-looking statements about the Fund, including its strategy, prospects and further actions. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", or negative versions thereof and similar expressions.

In addition, any statement made concerning future performance, strategies or prospects, and possible future Fund action is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to risks, uncertainties and assumptions about the Fund and economic factors, among other things.

Forward-looking statements are not a guarantee of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements. Any number of important factors could contribute to these digressions, including, but not limited to: geopolitical events, general economic conditions, political and market factors around the world; interest rates and inflation; fiscal and monetary policy; global equity and capital markets; business competition; technological change; changes in government regulations; unexpected judicial or regulatory proceedings.

We stress that the above-mentioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, except as may be required under applicable law, the Manager has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.
